PLACES ON THE COURSE ARE EXTREMELY LIMITED
**Introduction**

Symptom control in patients at the end of life can be extremely challenging for healthcare professionals, particularly those with non-malignant disease.

This course focuses on the management of non-malignant disease and the particular challenges of prognostication and symptom control in this group of patients.

Each session will be led by a Consultant in Palliative Medicine and Specialist Consultant Colleague. All sessions will be interactive and focused on the needs of GPs.

The course is the result of collaboration between 3 Specialist Palliative Care Services from across Liverpool, Sefton, St Helens and Knowsley.

**Course Description**

4 monthly evening sessions spread between February and May 2014.

Sessions run from 18.30 to 21.00 hrs with an evening meal at the start. Participants are expected to attend all 4 sessions.

Senior Clinicians from Palliative Medicine and the different specialities will lead and facilitate the evening.

**Aims of the Course**

The course will:

- Provide evidence based updates on symptom management topics.
- Provide information about emerging approaches to symptom control.
- Provide opportunity for facilitated group discussions of real cases.

**Cost**

£100 for 4 evening sessions.

This course is subsidised by an education grant from Cheshire & Merseyside Palliative and EOL Care Network.

**Dates & Topics**
